Commissioning Engineer – Test/Installation/Service

Matrix is currently seeking a fully qualified Commissioning Engineer. The ideal candidate should have a solid machine tool background (preferably in grinding type machine tools). As a Commissioning Engineer, you will be involved in the final test of equipment prior to delivery, site installation and the commissioning and service of a range of precision thread grinding machine tools. Overseas travel will be required.

REF: CE2017

Company: Matrix Machine Tool (Coventry) Ltd

Location: Coventry & Overseas Travel Required

Salary: Competitive (Dependant on experience)

Position Type: Permanent

Contract: Full Time- (Working Hours: Monday - Thursday 7.30am - 4pm, Friday 7.30am - 3pm)

Responsibilities

- Functional Testing of the machine to customer specifications
- Machine operation training
- Machine maintenance training
- Machine demonstrations
- After sales support
- Installation and commissioning at customers site
- Service

This position requires a well-motivated, confident Commissioning Engineer who can demonstrate the following;

- Have understanding and practical working knowledge of CNC machine tools
- Knowledge of the application and use of CNC grinding machine tools (NC programming experience would be an advantage)
- Ability to read and understand electrical and mechanical drawings
- Experience of electrical, mechanical and pneumatic/hydraulic fault finding
- Experience of Siemens systems and drives
- NC Programming experience
- Experience of modern abrasives and grinding methods
